

ProFlex Technical Documentation

By Lojain Nahhas

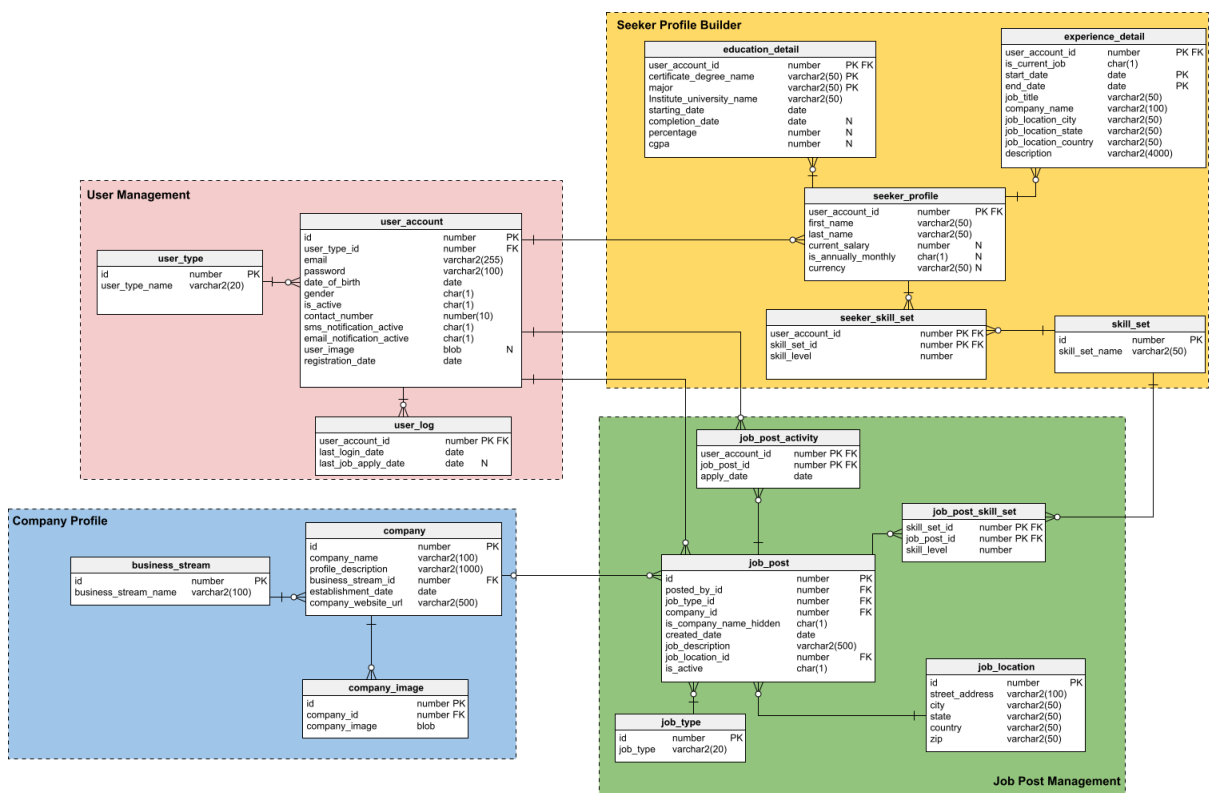

Brief:

ProFlex is an online consultancy platform that offers two main audience groups; recruiters and job seekers, to have a project-based collaboration.

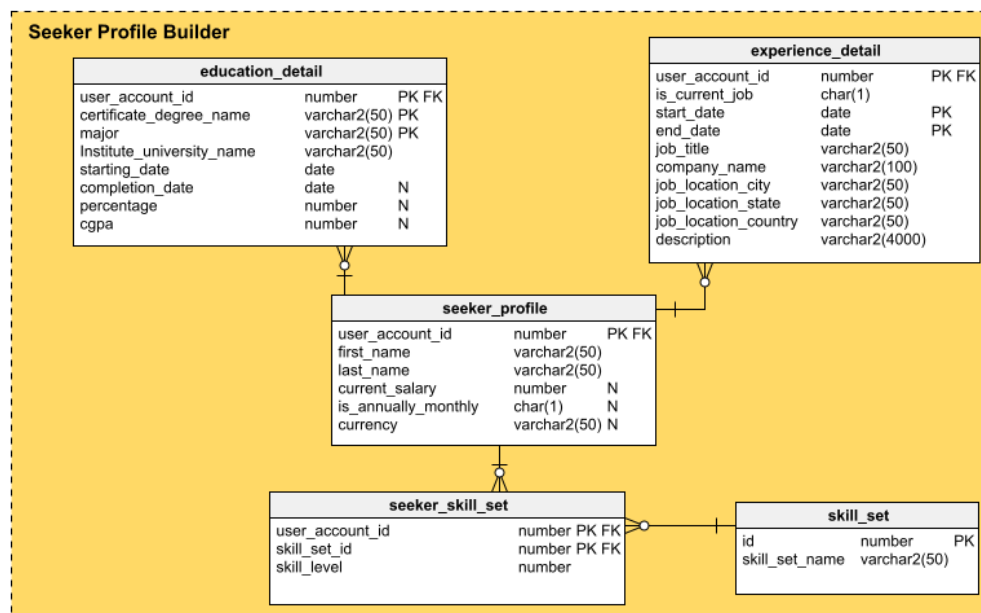

Technologies:

- PHP
- Laravel
- MySQL
- HTML
- CSS
- BootStrap
- JavaScript

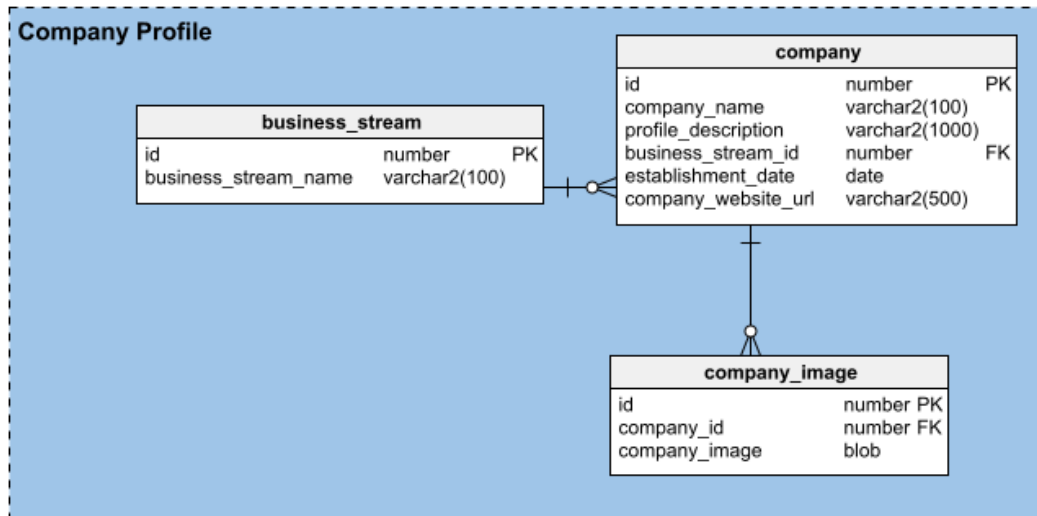

Database Architecture:

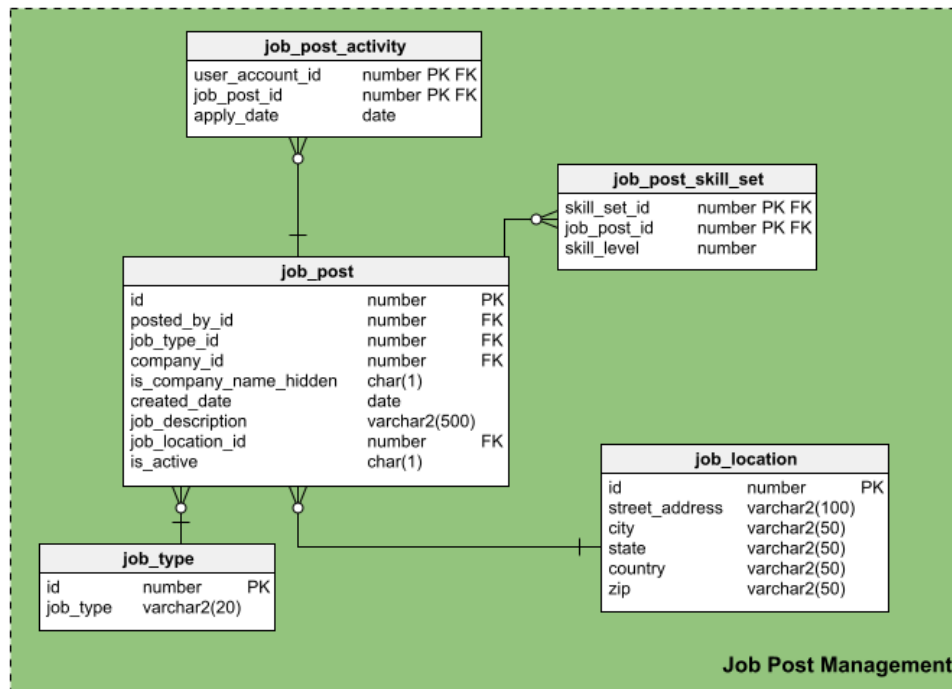

- **Seeker Profile:**

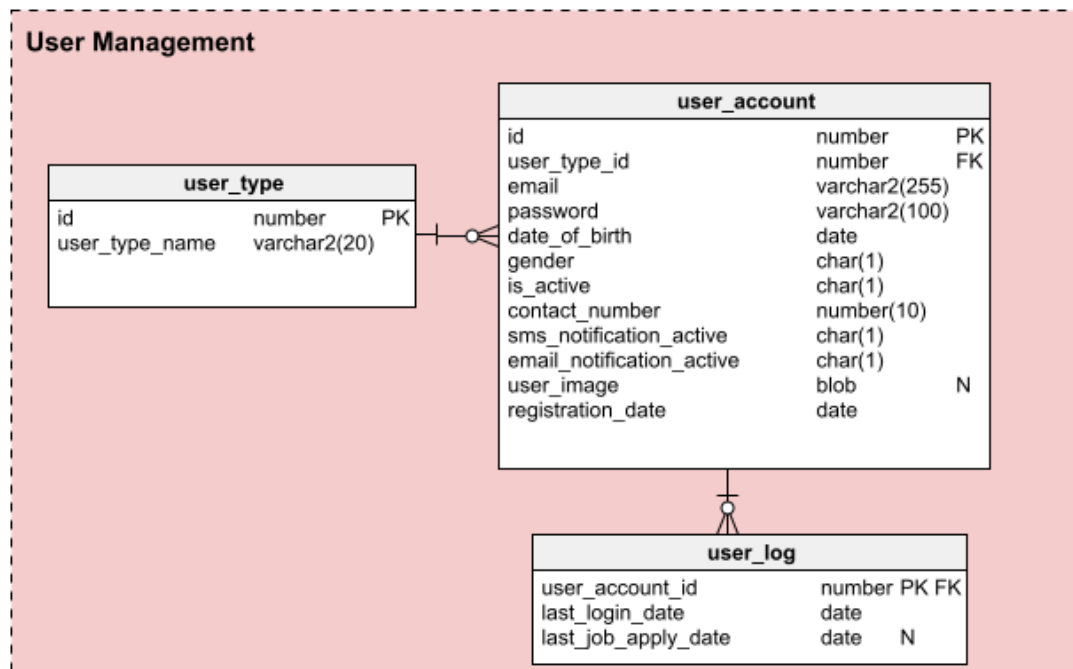

- Company Profile

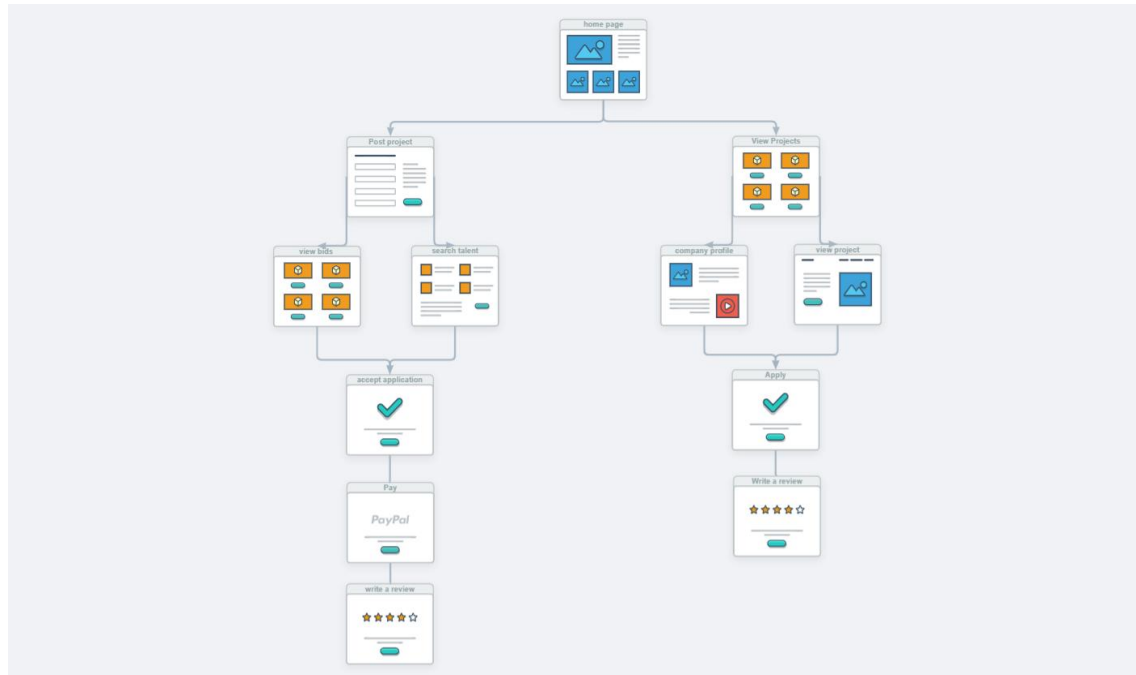

- Job Post Management

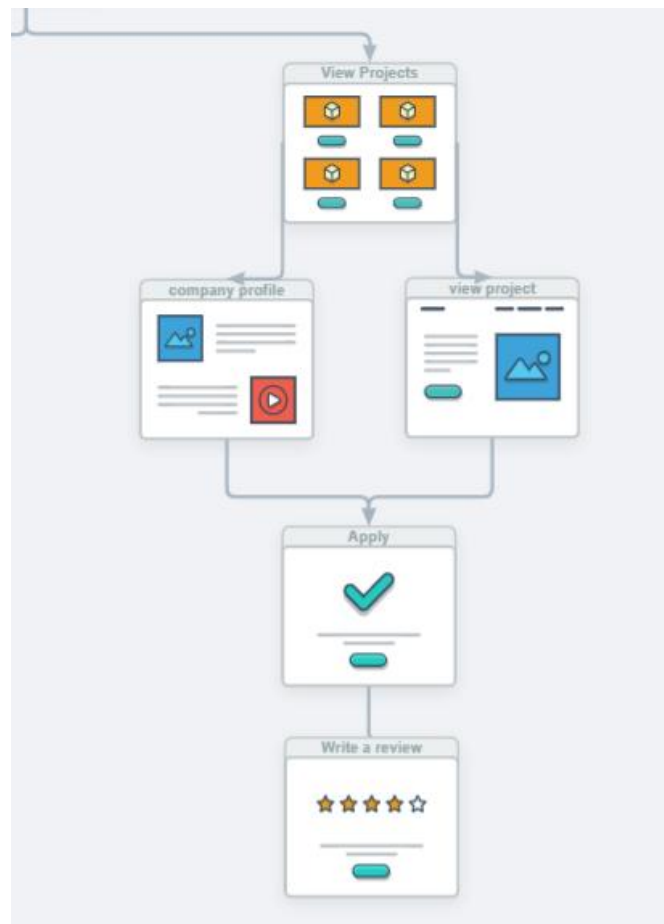

- User Management

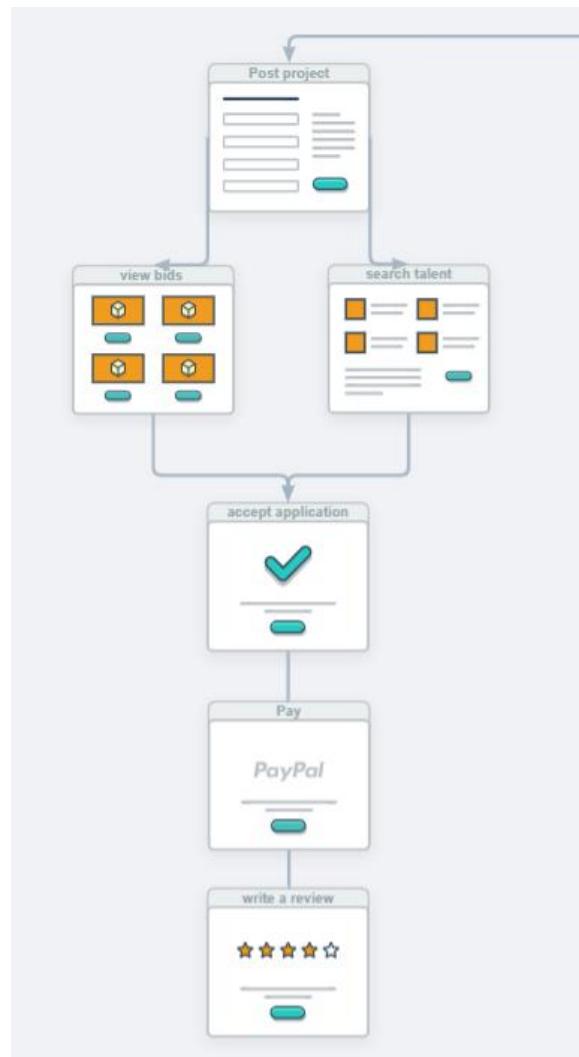

Screen Flow:

- Seeker Flow:

- Recruiter flow

Security:

Using Laravel authentication middlewares and policies, users get unauthorized error (403) if they attempted to visit a page through the url, for example:

- Showing or editing post by another user
- If user_type1 (job_seeker) tried to access the pages of user_type2 (Recruiter) and vice versa
- Laravel Auth and middlewares that distinguishes a guest from a registered user
